

LEON JO. FORSYTH
County Engineer

County Engineer

THE many county buildings require a vast amount of special work, and the services of an experienced engineer are in constant demand.

For a number of years Mr. Leon J. Forsyth has been in charge of this work.

Steam heating, water, general plumbing, and in fact, all repair work for the hospitals, court house, jail and other buildings owned by the county, are under the watchful eye of the engineer.

Mr. Forsyth's report to the auditors is to the point: "All buildings and equipment in good repair and ready for cold weather."
