To the Man Who is Hesitating...

There are many motorists here in this community who have given serious consideration to the purchase of a new Cadillac car this year-and yet, for one reason or another, have not made the move. If you are among them, we hope that you will pause to read the little message that follows. For we are sure you will find it interesting.

Ordinarily, when a man hesitates to make the move to Cadillac, it is because he is not familiar with the practical aspects of Cadillac ownership Insofar as original cost is concerned, a Cadillac is eminently practical. Several models, in fact, are actually priced competitively with the so-called "medium-priced" makes.

Operating and maintenance costs are also remarkably low. We have heard it said by new

owners that Cadillac is the most economical automobile they have ever owned.
