One of the high points of the month-long "Beautify Northville" campaign will take place this Saturday when a city-wide collection of trash will be sponsored by the com-

Several trucks acquired from local industry and the city will be manned by volunteers who will canvass the entire city. Anyone wishing to get rid of old building materials, brush, cans - in fact, almost anything except garbage - may leave it at the curb for pick-up.

All the energetic pick-up committee asks is that the trash is light enough to be lifted onto the trucks without mechanical help.

It would be a fitting climax to the fine efforts of the clean-up workers if everyone would make Saturday, May 17 "Clean-up Northville Day". Besides getting rid of all the old discards that have been cluttering up yards, attics, garages, etc., it would also show immediate results in the appearance of our community.

And think of the "fun" the volunteer pick-up committee

Tom Carrington told us today that he can remember reading the records of the first assessor in the early days when Northville became a village. Largest assessment (this was around 1870) was \$39 and the lowest was 50 cents. Total collection was \$500.

June 20 is the deadline for contributions to the Claude N. Ely Memorial Fund. Purpose and details of the fund have been explained in news stories, but perhaps it hasn't been pointed out that contributions of any amount, large or small, are welcome. The committee has asked The Record to publish the list of those who give. Only the names, not the amount of contribution, will be listed. The grand total will be made public, of course.

Those interested in giving should do so as soon as possible. Use the coupon on page one of The Record, or go directly to the Manufacturers National Bank in Northville where an account has been opened.

land on dry ground ten miles or less from a small city or town has the best record as an inflation should be purchased price, it should be purchased be-fore it is thought of for lots for development. However, even then, with roads, electricity, water and sewage, it gives one real security This may be more important than profit. Such land or small farm just outside a town limit should be excellent hedges.

If you do not want to be bother ed with the taxes and care of such and which you do not expect to occupy but are to hold for speculation your broker will name some land companies whose stocks are listed on a stock exchange. In fact, some railroads are worth more as land companies than as railroads. Some Canadian mining companies with valuable underground deposits of ore should also be good hedges against inflation if bought at low depreciated prices. They are off now about 50 percent — suffering from the big boom of a few years

CASH IN THE BANK Personally, I like best now put

ting my savings in the bank at 31/2 percent interest. Of course, your broker may tell you such bank deposits are poor hedges against in-flation. It is true that the purchasing power of a bank account for food , clothing and shelter will decline as the cost of living increases Therefore, I would not want to leave my funds in a bank account too long. But such a loss of interest or decline in purchasing power, over a few years, it not notable compared with the possible decline in stock prices during said period. When people ask me the bes fertilizer for an orange grove I always say: "The footprints of the owner." Hence, I believe that the best of all possible land purchase for an inflation hedge is land adjoining what you now own. Thi you can watch and make more valuable. Of course, you would not buy land anywhere that you did not first see. There is much land "outdoors" and no reader will see any one get a monopoly of it. In short I helieve inflation is slowly coming as it always has been; but it is nothing to get panicky about.

Biery Out To Defend State Title

Dick Biery will go after the state class B 440 title Saturday when he and N. C. Schrader represent Northville in the state track finals at East Lansing. Biery, who has gone into the finals for three straight years, took a second place silver medal in the 440 at East Lansing last

The Mustangs pair earned a trip to the finals when they placed in the regional trials at Ann Arbor last Saturday. Race Course as it awaits the begin-ning of 60 days of racing next Mon-Fans of past years won't recognize the DRC grandstand at School-craft and Middlebelt roads. Once covered with a somber green paint, the spacious grandstand now looks like a rephow after a grand Pland like a rainbow after a storm. Blending coral, pink, light and dark blue and a golden brown, the painters have produced a real traffic stop-

per.
As well as making it easy on the eyes, the DRC has made it easy on the eyes, the DRC has made it easy on the legs with the installation of escalators. The moving stairs run from just off the paddock area to the grandstand mezzanine and club house area.
On the racing side of the picture the DRC will climax the Michigan

thoroughbred season with the greatest week of racing the state has est week of racing the state has ever known.

Within the seven-day period of Sweep the Stakes Week, the track will offer the racing fans of Detroit and Michigan the \$50,000-added Michigan Hill July 19, the \$50,000-added Sweepstakes and the \$5,000-added Michigan Futurity, a special event for Michigan-foaled two-year-olds.

PLYMOUTH SAVES YOU MONEY ON GAS... MOBILGAS ECONOMY RUN VICTORY PROVES IT!

New "Fuel-Saver" Choke that helped clinch title is standard equipment on all Plymouth V-8s

Pound for pound, Plymouth uses less gasoline than either of the "other two" cars in the low-price "3"! This was proved beyond doubt when a 1958 Plymouth V-8 was officially declared winner of the low-price car competition in the 1958 Mobilgas Economy Run. Plymouth's competitors also entered cars with 6-cylinder engines (supposedly more economical) but Plymouth beat every car in its class—V-8s and 6s alike!

This title-winning Plymouth is exactly the same Belve-dere V-8 with TorqueFlite Automatic Transmission that you can buy right off your Plymouth dealer's floor. These tests prove that every Plymouth has built-in

stance—one of the most important factors in Plymouth's smashing win is the new "Fuel-Saver" Choke that you get at no extra cost on all Plymouth V-8s. This ingenious device employs a triple-stage vacuum piston and a new thermostatic element to reduce the amount of fuel you use in warming up the engine. So it can save you even more on short-distance drives - the kind most people make. Among the many other savings Plymouth gives you is the \$140 you save on standard-equipment Torsion-Aire Ride. The "other two" charge up to that much extra for their best suspension systems.

So if you are dollar-conscious, better hustle over and talk terms and trade with your Plymouth dealer. He wants

your business, and he'll go all out to get it! COMPLETE THE CIRCLE OF SAFETY . . . CHECK YOUR

Although Northville has little industry to boast about today, Fred Van Atta, 136 East Cady, says it wasn't always

Around the turn of the century this was a booming industrial area, says Van Atta, and he brought a book along to

At that time the village of Northville was credited with being the largest manufacturing center in Wayne county outside of Detroit and Wyandotte.

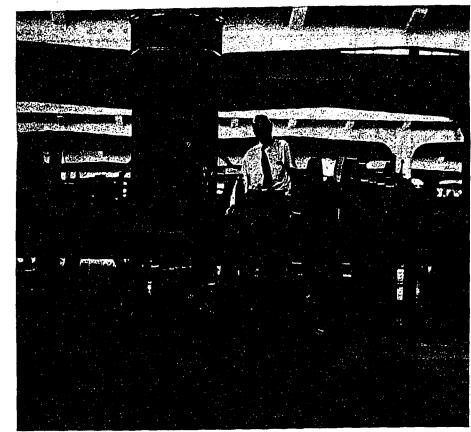

Van Atta is shown below with a giant 24-foot long lathe that is now located in Greenfield Village. The lathe was a gift from Van Atta to Henry Ford.

It was originally used at Meads Mill (now the park area) by a firm manufacturing land rollers. Later it was moved to the prosperous American Bell and Foundry plant located at the site of the recently burned-down Allied plant.

Van Atta came into possession of the lathe when he moved his Superior Churn company into the American Bell and Foundry plant. Earlier he had used the top floor of the Union Manufacturing and Lumber company, now the Ford Valve plant. For six months after Ford purchased the Union Manufacturing plant Van Atta continued to lease the upstairs space and it was then that he became acquainted with Henry Ford. According to Van Atta, Ford was a frequent visitor in

Aircraft for turning nose sections of their airplanes. Finally he called up his friend Henry Ford and offered the lathe for the museum.

While we're reminiscing, below are two other photographs of Northville in the earlier days. The two pictures belong to Leona Parmalee of the Manufacturers National Bank, One is a scene of Northville Downs taken around 1910; while the other is the corner of Main and Center streets where The Record office is now located.
