MRS. DAN MacGillivray (left) and Mrs. Robert Ronk at water wagon

smile when you outfit them for school ...via an NBD savings account

Who knows better than you the expense of outfitting a growing child for the call back to school this fall? Remember last year? It was money for a new hat and coat. Or a new jacket and helmet. Money for new dresses, blouses, shoes, mittens, jeans, shirts, shorts, boots and belts. Pencils, notebooks, rulers. On and on and on until you thought the bills would never stop.

This year, plan things so that you can take back-to-school expenses right in stride. Start tucking away a few dollars every week in a National Bank of Detroit savings account. Then when school bells ring, you'll hear only a pleasant melody. No scrimping, fretting, scrambling or straining

Open your account now—one dollar will do it—and save regularly at any of NBD's 61 friendly neighborhood offices, where sound management policies put solid security behind every dollar on deposit. Let it rain school expenses. You'll have an umbrella of cash.

ONLY A FEW HOURS after the pouring, visitors - like Ken Bernard (left) and Jack Crawford of the Novi school board - could walk around on the roof. Other visitors included a number of construction engineers, architects and professors from the University of Michigan. The roof will later be finished on top and acoustically tiled on the bottom. The school is the first in this area to have such a roof. In back-

WORKMEN DIRECT THE FLOW of concrete onto the forms. It was then mechanically vibrated into place and smoothed out. The forms and scaffolding will be removed after the cement cures. The roof was poured by the Fendt Construction company in conjunction with Atkin-

ROOF A'COMING - One reason why Novi's new elementary school has already gained national attention was shown Tuesday when a unique accordion-like cement roof was poured over the multi-purpose room. The roof, five inches thick, has no supports except along the walls, yet is stronger than conventional roofs. Shown above is the elaborate scaffolding and form-work onto which the concrete was poured. The job took
