NEW MERCURY METEOR NOW PRICED TO COMPETE WITH FORD, CHEVROLET AND PLYMOUTH!

THE MERCURY METEOR

LUXURY CAR "FEEL"

In Mercury Meteor, you'll discover a new world of driving and handling comfort. Cushion-Link suspension . . . a patent-applied-for feature . . . completely absorbs the bumps and bounces of road irregularities before they reach you or your passengers. For extra ride stability, new wider-track front wheels (60 inches) and a long, 120-inch wheelbase . . . longest wheelbase in the low-price field . . . help take the sway out of curves. And for extra comfort and quiet, Mercury Meteor models have more insulation in more places than any other low-price cars. This cuts down on heat and noise in the passenger compartment for a more quiet, more comfortable ride.

NEW 6-CYLINDER Economy Engine

Also new for '61 is the Super-Economy 6-cylinder engine . . . Mercury's first 6-cylinder engine in 22 years. It squeezes up to 15% more mileage from every gallon of regular gas and delivers outstanding performance and versatility. It is available on both Meteor 600 and 800 series, as well as the Commuter Station Wagon.

BEST BUY IN THE LOW-PRICE FIELD

For 1961, Mercury introduces two new series with features and values never before found in any low-price car. Mercury Meteor 600 is priced right in the heart of the low-price field. Mercury Meteor 800 is priced to compete with the top series of the low-price field.

The 1961 Mercury looks better . . . trimmer, cleaner, shorter, narrower. The styling and size are completely new. Mercury 600 and 800 series are easy to handle and park, easy to get in and out of your garage. Interiors are beautifully luxurious, as deluxe as you'll find in cars costing much more. They're roomy, too . . . even roomier than last year. You get more rear-seat shoulder room, hip room and head room. Also, there's more entrance room and trunk space.

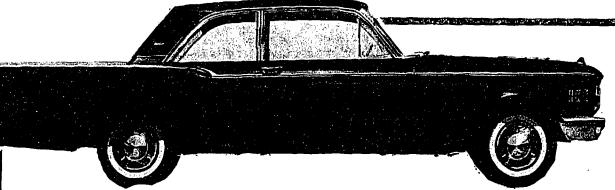

Exclusive New Cushion-Link Suspension Gives You the Best Ride In The Low-Price Field

Never before has any car at so low a price been so comfortable as Mercury. Exclusive, patent-applied for Cushion-Link* suspension, first and only in the industry, makes the big difference in Mercury's "fine-car feel". The Cushion-Links, front and rear, allow each wheel to "give" slightly on impact . . . to smother bumps and road shock. Improved balljoint, swept-back front suspension . . . 60-inch long rear springs . . . soft-tread tires also help Mercury take the roughest roads in stride. For stability and positive control, there's nothing quite like a Mercury . . . with wider-tread front wheels, recirculation ball-type steering and torsional stabilizer bar. The quiet luxury you enjoy in Mercury is almost beyond belief, thanks to extra body insulation.
