Every year about this time it has been our practice to remind parents and motorists that the warm days of summer bloom forth with more than flowers, green grass and leaves. This wonderful season is for children. And they spring up all around us - playing ball, skipping rope, fishing, running and experiencing exciting new adventures in the world of

ards of traffic, deep water, holes and caves, trees, rusty nails and the countless other possibilities that could bring injury or even death, accidents still happen.

And who can honestly expect their busy minds to remem ber that cars kill when there is something new and wonderfully fascinating - such as a tiny fish in a pail of water - to behold. The death of a six-year-old boy saddened Northville last week. There is no explanation for a tragic accident like this.

An era ended last week for The Northville Record.

where it will continue to produce a weekly newspaper.

This week The Record is installing a Model E Goss webfed flat-bed press. It will do the job of the Miehle five times as
fast, printing twice as many pages at once while doing the

BUCKET SEATS ALONE DO NOT A MONZA MAKE

could buy a car that treats you, the driver, like you want to be treated. . The oucket seats, of course, are the most obvious evidence of our desire to please you But they're not the most important thing. No sir. What's really vital is the way a Monza handles—some hing nobody in the U.S. has yet copied. Or can copy. Because Corvair is the only rear-engined car made in this ountry, and you know what that means: steering light as histledown. (You even park this one more easily, it steers so briskly.) Beautifully balanced braking—the car stays level even under panic braking, which we hope you'll never have to do. Traction and more traction, so you don't bécome a stick-in-themud. The kind of cornering that's sheer joy to experience. A You get more: a fully independent suspension that blots out road shocks before they can ruffle you. Clean, crisp styling. Thoroughgoing economy, from purchase price to operating cost. W You're not going to be satisfied with bucket seats alone, are you?

She's frightened. She's seeing the world for the first time through It's no wonder you and I are frightened. Ever since we were old

enough to reason, we have been seeing the world through dark glasses. It's just as Paul said: "Now we see through a glass, darkly; but then face to face." We spend our years wondering why things happen as they do . . . why hatred flourishes and love withers . . . why sorrow seems inevitable and joy so rare. Apparently, we were not meant to understand . . .

Some truths God has revealed to us; these our Churches teach. Other truths God will not reveal until another day; to prepare us for that day

Until at length we gain that complete vision, we are happiest and strongest when we live faithfully in the truth already revealed. Even with dark glasses a man can see as long as he walks toward the Light.

MANY OF US who have watched the satellite Echo move across the night sky realize that the project gave America a clear lead in space communications. However, the longer we delay in setting up the first satellite system, the more we risk losing our lead.

The Bell Telephone System has offered to build and pay for experimental satellites. It is willing to pay for their launching and for the ground stations in the U.S. (Foreign ground stations would be owned by foreign communications agencies.) There would be no cost to the taxpayer.

The Bell System's interest in space stems from the fact that a space communications system would be a natural extension of networks used in providing service to the nublic today. Bell seeks no monopoly and does not wish to exclude other international carriers either from establishing satellite communications systems or from sharing use of the system it proposes. This system would be operated under government regulation iust as today's communications systems are operated.

What could offer a better means to serve the public's interest in a broader communications network for tomorrow!

tions being held Monday in Northville and Novi. It's probable that voters will stay away in droves in Northville where only one candidate's name appears on the ballot. But for those who do perform their duty in the Northville district attention should be given to the lone proposition appear

A "yes" vote here is required to permit the school district to use a dormant account to help retire a 1957 bond issue. The funds had been earmarked for a 1949 bond issue which is al ready retired, but they cannot be used for another purpose without voter approval. So vote "yes" on this proposition

Monday evening's article was especially interesting to me. It's headline "Worn-Out Body Will Be Replaced" is

enough to catch any reader's eye. There have been times, which occur more frequently of late, when I have felt

But according to the dateline, I'll have to wait until 1970.

For then, the article asserts, a typical news story might read:
"A surgeon today successfully transplanted a human heart from an auto crash victim to a patient whose heart had been failing".

It appears, experts say, that we're on the threshold of successfully transplanting hearts, lungs, glands, livers and even hands and feet . . . "just like changing a spare tire".

Amazing, indeed. But what struck me like a thunderbolt in the present real estate cycle.

The process of speculating in vacant land, there are certain facts you should get: Determine the current land values and prices in the area, tax rates and appraisal methods, new roads and highways approved for construction (as well as those in struction (as well as those in struction (as well as those in the proposal stage) all next. Amazing, indeed. But what struck me like a thunderbolt estate cycle. was the name of the doctor who is performing some of these Of course, the general con nent construction plans by gov.
